‘To be the best you can be’

## Humanities Department

Welcome to the Humanities department. Here at Chesterton Community Sports College we pride ourselves on our ability to enthuse and inspire our pupils with engaging lessons and experiences which they will remember for the rest of their lives, both inside and outside of the classroom.

Our large, friendly department currently consists of six passionate teachers who all share the belief that the subjects within our department (History, Geography and Citizenship) help shape our learners into well-rounded young people with a passion for continued learning about the world around them. As testament to the popularity of our subjects, a full-time position has arisen here at CCSC. Do you feel that you have the same passion for inspiring young people? Then we would love to meet you!

The Humanities department currently has six classrooms. Each classroom is equipped with 'Apple TV', which will link to your personal MacBook and iPad. In addition to this, all pupils enjoy the use of their own iPad, which are incorporated into the everyday learning of all pupils.

Despite our consistently large cohort, History results are consistently good and continue to improve year on year. Subjects studied at GCSE History include; Elizabethan England, The Cold War, Germany 1890-1945 and Britain, Health and the People.

We also subscribe readily to the belief that learning outside the classroom gives pupils the opportunity to experience history first-hand. As such we run many trips each year for all year groups across both key stages including a foreign trip each year. These have previously included Auschwitz, Pompeii and Berlin.
